Lake Hugh Muntz

5 March 2018 at 8:30 pm

TO WHOM IT MAY CONCERN

During my time as both Nipper and Open Competitor Coach of Northcliffe Surf Life Saving Club, there was always the ocean to do the majority of our training. When the conditions got rough or dangerous however, we always had a duty of care to provide a safe and acceptable swimming and paddling environment to all the competitors both Nippers and Open. Lake Hugh Muntz was and is the perfect training environment for all Life Saving Disciplines. With the increasing population of bull sharks in the canal systems, these waterways were not able to be considered as a safe training alternative to the ocean. I therefore ask on behalf of all the Life savers who use this facility to do whatever is necessary to make the water quality of this lake safe and acceptable. Regards Noel Kolkka (former coach & current Chaplain and Life Member of BMD Northcliffe SLSC)
