

Good Morning,

As Head of Merrimac State High School's Marine Department I would like to acknowledge and support the action you have been trying achieve with the Gold Coast City Council in relation to Lake Hugh Muntz. Our Marine Education students (six classes) are regular users of the lake during Term 1 & 4 each year for sailing and developing personal water skills in relation to water rescues and safety. For two years we have had our water based programs disrupted for weeks due to the algae blooms in the lake and have been in contact with the 'Lakes and Waterways' about the water testing. Please let me know how the school can assist in trying to get the Council to take positive action on the Lake management

Regards

Warren Joseph

HOD - HPE/ Marine Education
